

## FOLDING STACKING BASKETS KSD (wire stacking feet)

Baskets are mainly intended for storage and loose display of fast-rotating goods in stores and supermarkets.

**Possible use of baskets:**

- setting on the racks shelf
- separate placed on the ground
- stacking baskets one on another
- assembly on the movable chassis

Its small dimensions after folding means that when a basket is not being used, it doesn't take up warehouse space.

**Standard finish:** zinc plated + lacquer .

**Technical data:** The structure of basket made of spot welded wire. The bottom is reinforced with flat irons against deformation under heavy loads. The movable chassis made of sections.

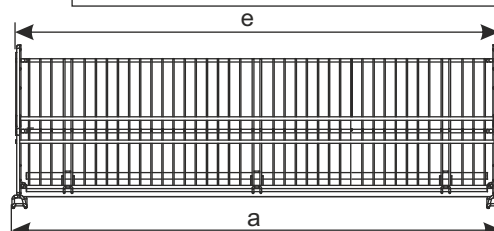

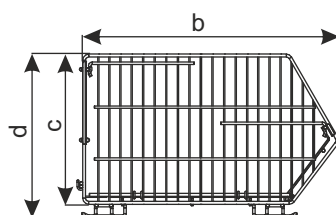

**Maximum loading:**

(with equable spreading of the goods):

single basket - 100 kg,

3 stacked baskets - 100kg/50kg/50 kg.

TYPE OF THE BASKET	DIMENSIONS (mm)				
	a	b	c	d	e
1210X670 H-400	1240	670	385	420	1205
600x640 H-400	600	620	365	400	560

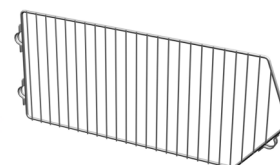

### ADDITIONAL ACCESORIES:

Aesthetic wire divider can be used to divide the basket at any location, allowing a larger number of different products to be displayed. Base with wheels makes the baskets become an independent movable rack.

**Movable chassis to the stacking basket**

**Divider to the basket**
