

**DISPLAY TABLE 1200X800 H850/650  
FOLDED INTO HORIZONTAL POSITION**

**NEW!**

Table - powder coated

Folded 3 tables

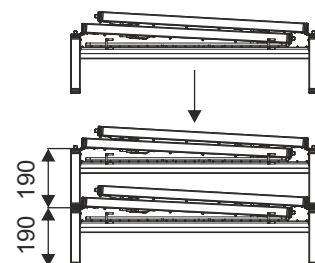

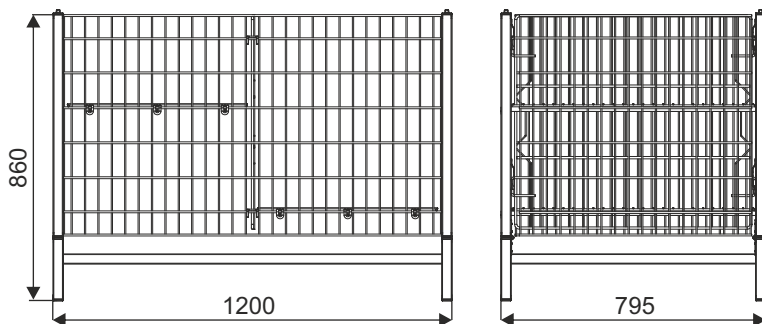

Table - chrome/zinc plated

Display tables allow for presentation of small and unwieldy goods. The construction ensures that the display table is very stable and highly resistant to damages. The bottom reinforced with flat irons allows for exposition of goods with various sizes and weights. There is possibility of adjust the height of the bottom on two different levels at the same time. Divider and bottom split into two separate parts allow the exposure of different types of assortment at the same time. The construction of the table allows for easy folding and unfolding. Unused tables can be quickly folded and stacked on top of each other, so they don't take up excessive warehouse space.

**Standard finish:** powder coated, optionally zinc plated + lacquer or bright chrome.

**Technical data:** Structure made of section, side meshes and the divider made of steel wire. Bottom made of steel wire is reinforced with flat iron and it consists of two parts. The frame, legs and sides are connected together with the possibility of convenient folding and unfolding the table.

**Maximum loading:** 150 kg (with equable spreading of the goods).
